CONTENTS OF VOLUME 50

NUMBER 1, 28 MAY 1970

KATES, J. and BEESON, J., Ribonucleic Acid Synthesis in Vaccinia Virus. I. The Mechanism of Synthesis and Release of RNA in Vaccinia Cores 1

KATES, J. and BEESON, J., Ribonucleic Acid Synthesis in Vaccinia Virus. II. Synthesis of Polyriboadenylic Acid 19

YANAGIDA, M., BOY DE LA TOUR, E., ALFF-STEINBERGER, C. and KELLENBERGER, E., Studies on the Morphopoiesis of the Head of Bacteriophage T-even. VIII. Multilayered Polyheads 35

HUTCHINSON, F. and HALES, H. B., Mechanism of the Sensitization of Bacterial Transforming DNA to Ultraviolet Light by the Incorporation of 5-Bromouracil 59

INOUYE, M., AKABOSHI, E., KURODA, M. and TSUGITA, A., Replacement of All Tryptophan Residues in T4 Bacteriophage Lysozyme by Tyrosine Residues 71

NACHMIAS, V. T., HUXLEY, H. E. and KESSLER, D., Electron Microscope Observations on Actomyosin and Actin Preparations from *Physarum polycephalum*, and on their Interaction with Heavy Meromyosin subfragment I from Muscle Myosin 83

POLLARD, T. D., SHELTON, E., WEIHING, R. R. and KORN, E. D., Ultrastructural Characterization of F-Actin Isolated from *Acanthamoeba castellanii* and Identification of Cytoplasmic Filaments as F-Actin by Reaction with Rabbit Heavy Meromyosin 91

HENRY, Y. and BANERJEE, R., Electron Spin Resonance Spectra of Isolated Ferrihemoglobin (α, β and γ) Chains—An Attempted Correlation with Optical Absorption Spectra 99

HUBACEK, J. and GLOVER, S. W., Complementation Analysis of Temperature-sensitive Host Specificity Mutations in *Escherichia coli* 111

COX, E. C., Mutator Gene Action and the Replication of Bacteriophage λ DNA 129

JOYNSON, M. A., NORTH, A. C. T., SARMA, V. R., DICKERSON, R. E. and STEINRAUF, L. K., Low-resolution Studies on the Relationship between the Triclinic and Tetragonal Forms of Lysozyme 137

MOWSHOWITZ, D. B., Transfer RNA Synthesis in HeLa Cells. II. Formation of tRNA from a Precursor *in vitro* and Formation of Pseudouridine . . 143

SAENGER, W. and SCHEIT, K. H., A Pyrimidine Nucleoside in the *syn* Conformation: Molecular and Crystal Structure of 4-Thiouridine-hydrate . . 153

Appendix—The Definition of the Torsional Angle about the Glycosidic C(1′)—N bond in Nucleosides 166

KELLEY, W. S. and SCHAECHTER, M., Kinetic Studies of the *in vivo* Exchange of Ribosome Subunits in *Bacillus megaterium* 171

Appendix—KELLEY, W. S. and KOCH, A. L., Pipe Line Model of the Ribosome Cycle 182

ZEBOVITZ, E. and BROWN, A., Altered Viral Ribonucleic Acid Synthesis by a Temperature-sensitive Mutant of Eastern Equine Encephalitis Virus . 185

LETTERS TO THE EDITOR—

ROTHSTEIN, E. and FEATHERSTONE, R. M., Clathrate Model for the Thermodynamics of the Interaction of Metmyoglobin and an Anesthetic Gas 199

KIMES, R. and GREEN, M., Adenovirus DNA. II. Separation of Molecular Halves of Adenovirus type 2 DNA 203

NUMBER 2, 14 JUNE 1970

LEBERMAN, R. and FINCH, J. T., The Structures of Turnip Crinkle and Tomato Bushy Stunt Viruses. I. A Small Protein Particle Derived from Turnip Crinkle Virus 209

Appendix—LEBERMAN, R. and LONGLEY, W., X-ray Diffraction Studies on Crystals of the Small Particles 213

FINCH, J. T., KLUG, A. and LEBERMAN, R., The Structures of Turnip Crinkle and Tomato Bushy Stunt Viruses. II. The Surface Structure: Dimer Clustering Patterns 215

MARKLEY, J. L. and JARDETZKY, O., Nuclear Magnetic Resonance Studies of the Structure and Binding Sites of Enzymes. XIV. Inhibitor Binding to Staphylococcal Nuclease 223

ALTMAN, S. and LERMAN, L. S., Kinetics and Intermediates in the Intracellular Synthesis of Bacteriophage T4 Deoxyribonucleic Acid . . 235

ALTMAN, S. and LERMAN, L. S., Effects of 9-Aminoacridine on Bacteriophage T4 Deoxyribonucleic Acid Synthesis 263

MOORE, P. B., HUXLEY, H. E. and DEROSIER, D. J., Three-dimensional Reconstruction of F-Actin, Thin Filaments and Decorated Thin Filaments 279

Appendix—MOORE, P. B. and DEROSIER, D. J., Deconvolution . . 293

MCCONNELL, B. and VON HIPPEL, P. H., Hydrogen Exchange as a Probe of the Dynamic Structure of DNA. I. General Acid–Base Catalysis . . 297

MCCONNELL, B. and VON HIPPEL, P. H., Hydrogen Exchange as a Probe of the Dynamic Structure of DNA. II. Effects of Base Composition and Destabilizing Salts 317

Shih, T. Y. and Bonner, J., Template Properties of DNA–Polypeptide Complexes 333

Djaldetti, M., Chui, D., Marks, P. A. and Rifkind, R. A., Erythroid Cell Development in Fetal Mice: Stabilization of the Hemoglobin Synthetic Capacity 345

Morrison, S. L. and Zipser, D., Polypeptide Products of Nonsense Mutations. I. Termination Fragments from Nonsense Mutations in the *Z* Gene of the *lac* Operon of *Escherichia coli* 359

Inners, L. D. and Felsenfeld, G., Conformation of Polyribouridylic Acid in Solution 373

Herriott, J. R., Sieker, L. C., Jensen, L. H. and Lovenberg, W., Structure of Rubredoxin: An X-ray Study to 2·5 Å Resolution 391

Westphal, H., SV40 DNA Strand Selection by *Escherichia coli* RNA Polymerase 407

Hyman, R. W. and Davidson, N., Kinetics of the *in vitro* Inhibition of Transcription by Actinomycin 421

Riley, M. and Paul, A. V., Two- and Three-stranded Complexes containing Homopolymers Polyriboadenylic Acid and Polyribobromouridylic Acid . 439

Ikeda, H., Inuzuka, M. and Tomizawa, J., P1-like Plasmid in *Escherichia coli* 15 457

DePhillips, H. A., Jr., Nickerson, K. W. and Van Holde, K. E., Oxygen Binding and Subunit Equilibria of *Busycon* Hemocyanin . . . 471

Adhya, S. and Campbell, A., Crypticogenicity of Bacteriophage λ . . 481

King, M. V. and Young, M., Selective Non-enzymic Cleavage of the Myosin Rod. Electron-microscopic Studies on Crystals and Paracrystals of Light Meromyosin-C 491

Lord, R. C. and Yu, N.-T., Laser-excited Raman Spectroscopy of Biomolecules. I. Native Lysozyme and its Constituent Amino Acids . . 509

Ramareddy, G. and Reiter, H., Sequential Loss of Loci in Thymine-starved *Bacillus subtilis* 168 Cells. Evidence for a Circular Chromosome . . 525

Reiter, H. and Ramareddy, G., Loss of DNA behind the Growing Point of Thymine-starved *Bacillus subtilis* 168 533

Levine, A. J., Kang, H. S. and Billheimer, F. E., DNA Replication in SV40 Infected Cells. I. Analysis of Replicating SV40 DNA 549

Letters to the Editor—

Nezlin, R. S., Zagyansky, Y. A. and Tumerman, L. A., Strong Evidence for the Freedom of Rotation of Immunoglobulin G Subunits . . 569

Rosenthal, P. N. and Fox, M. S., *In vivo* Restoration of the Biological Activity of Transforming DNA inactivated by ^{32}P Disintegration . 573

NUMBER 3, 28 JUNE 1970

DOERFLER, W. and KLEINSCHMIDT, A. K., Denaturation Pattern of the DNA of Adenovirus Type 2 as determined by Electron Microscopy . . . 579

COHEN ADDAD, J. P., Conformational Changes of Ribonuclease A as seen by Nuclear Magnetic Resonance Line Shifts 595

JORDAN, B. R., FEUNTEUN, J. and MONIER, R., Identification of a 5 s RNA Precursor in Exponentially Growing *Escherichia coli* Cells . . . 605

TAN, C. H. and MIYAGI, M. Specificity of Transcription of Chromatin *in vitro* . 641

FAN, H., and PENMAN, S., Regulation of Protein Synthesis in Mammalian Cells. II. Inhibition of Protein Synthesis at the Level of Initiation during Mitosis 655

COHEN, S. N. and MILLER, C. A., Non-chromosomal Antibiotic Resistance in Bacteria. II. Molecular Nature of R-factors isolated from *Proteus mirabilis* and *Escherichia coli* 671

LODISH, H. F., Secondary Structure of Bacteriophage f2 Ribonucleic Acid and the Initiation of *in vitro* Protein Biosynthesis 689

LETTERS TO THE EDITOR—

HECK, H. d'A., A General Derivation of the Binding Potential . . 703

RAJBHANDARY, U. L. and KUMAR, A., A Formylatable Methionine Transfer Ribonucleic Acid from Yeast: Comparison of Coding Properties and Sequences around the Anticodon with *Escherichia coli* Formylatable Methionine Transfer RNA 707

CARTER, B. J. and SMITH, M. G., Intracellular Pools of Bacteriophage λ Deoxyribonucleic Acid 713

Index to Volume 50

Acanthamoeba castellanii F-actin, ultrastructural characterization, 91
Actinomycin, kinetics of the *in vitro* inhibition of transcription, 421
Actomyosin and actin from *Physarum polycephalum*, electron microscopic observations, 83
Adenovirus DNA, separation of molecular halves, 203
— type 2, denaturation pattern of its DNA as determined by electron microscopy, 579
Adhya, S. & Campbell, A., Crypticogenicity of bacteriophage λ, 481
Akaboshi, E. (see also Inouye, M.), 71
Alff-Steinberger, C. (see also Yanagida, M.), 35
Altman, S. & Lerman, L. S., Effects of 9-aminoacridine on bacteriophage T4 deoxyribonucleic acid synthesis, 263
— & —, Kinetics and intermediates in the intracellular synthesis of bacteriophage T4 deoxyribonucleic acid, 235
Amino acid sequence comparison used for an evaluation of the relatedness of proteins, 617
9-Aminoacridine, effects on bacteriophage T4 DNA synthesis, 263
Anaesthetic gas, a clathrate model for the thermodynamics of its interaction with metmyoglobin, 199
Antibiotic resistance in bacteria, non-chromosomal, 671

Bacillus megaterium, kinetic studies of the *in vivo* exchange of ribosome subunits, 171
— *subtilis* 168, loss of DNA behind the growing point of thymine-starved cells, 533
— — —, sequential loss of loci in thymine-starved cells: evidence for a circular chromosome, 525
— — —, thymine-starved, loss of DNA, 533
Bacteria, non-chromosomal antibiotic resistance, 671
Bacterial transforming DNA, mechanism of its sensitization to ultraviolet light by the incorporation of 5-bromouracil, 59
Bacteriophage f2 ribonucleic acid, secondary structure and the initiation of *in vitro* protein biosynthesis, 689
— λ, crypticogenicity, 481
— — DNA, intracellular pools, 713
— — — replication, mutator gene action, 129
— SV40 DNA strand selection by *Escherichia coli* RNA polymerase, 407
— T-even, morphopoiesis of the head, 35
— T4 DNA, kinetics and intermediates in its intracellular synthesis, 235
— — lysozyme, replacement of all tryptophan residues by tyrosine residues, 71
— — DNA synthesis, effects of 9-aminoacridine, 263
Banerjee, R. (see also Henry, Y.), 99
Beeson, J., (see also Kates, J.), 1, 19
Billheimer, F. E. (see also Levine, A. J.), 549
Binding potential, a general derivation, 703
Bonner, J. (see also Shih, T. Y.), 333
Boy de la Tour, E. (see also Yanagida, M.), 35
5-Bromouracil incorporation into bacterial transforming DNA, mechanism of sensitization to ultraviolet light, 59
Brown, A. (see also Zebovitz, E.), 185
Busycon hemocyanin, oxygen binding and subunit equilibria, 471

Campbell, A. (see also Adhya, S.), 481
Carter, B. J. & Smith, M. G., Intracellular pools of bacteriophage λ deoxyribonucleic acid, 713
Chromatin, specificity of transcription *in vitro*. 641
Chui, D. (see also Djaldetti, M.), 345
Clathrate model for the thermodynamics of the interaction of metmyoglobin and an anesthetic gas, 199
Addad, J. P. Cohen, Conformational changes of ribonuclease A as seen by NMR line shifts, 595
Cohen, S. N. & Miller, C. A., Non-chromosomal antibiotic resistance in bacteria. II. Molecular nature of R-factors isolated from *Proteus mirabilis* and *Escherichia coli*, 671

Conformational changes of ribonuclease A as seen by NMR line shifts, 595
Cox, E. C., Mutator gene action and the replication of bacteriophage λ DNA, 129
Crypticogenicity of bacteriophage λ, 481

Davidson, N. (see also Hyman, R. W.), 421
Deoxyribonucleic acid, adenovirus, separation of molecular halves, 203
— —, bacterial transforming, mechanism of its sensitization to ultraviolet light by the incorporation of 5-bromouracil, 59
— —, bacteriophage λ, intracellular pools, 713
— —, effects of base composition and destabilizing salts on the dynamic structure, using hydrogen exchange as a probe, 317
— —, hydrogen exchange as a probe of its dynamic structure, 297
— —, kinetics and intermediates in the intracellular synthesis of bacteriophage T4 DNA, 235
— —, λ, mutator gene action and the replication, 129
— — loss behind the growing point of thymine-starved *Bacillus subtilis* 168, 533
— — of adenovirus type 2, denaturation pattern as determined by electron microscopy, 579
— — — bacteriophage SV40, strand selection by *Escherichia coli* RNA polymerase, 407
— — –polypeptide complexes, template properties, 333
— — replication in SV40-infected cells, 549
— — synthesis in bacteriophage T4, effects on 9-aminoacridine, 263
— —, transforming *in vivo* restoration of biological activity inactivated by ^{32}P disintegration, 573
DePhillips, H. A., Jr., Nickerson, K. W. & Van Holde, K. E., Oxygen binding and subunit equilibria of *Busycon* hemocyanin, 471
